

# IoT BASED SOLAR VEHICLE

## ABSTRACT

There are so many vehicles that came to influence in the exiting world. Their operating systems are based on usual fossil fuel system. At the present sense the fossil fuel can exceed only for a certain period after that we have to go for a change to other methods. Thus we have made an attempt to design and fabricate an ultimate system (Solar vehicle) which would produce effective result than the existing system. This will be very useful to the future needs of the world. In By the end of 2020, fuel deposit in the world completely depleted. To avoid this type of problems we need other type of energy sources like non-conventional energy sources. The progress of automobiles for transportation has been intimately associated with the progress of civilization. The automobile of today is the result of the accumulation of many years of pioneering research and development. In the modern trend automobiles have certain disadvantages soon as fuel cost relative to mileage, pollution and less efficiency.
